

System Requirements for Payroll & Financial Center and the Employee Work Center

The recent upgrade of Workday will require the use of two different browsers, or the use of [Google Chrome Frame](#) (with Internet Explorer 7 or 8) for Employee Work Center access. The Payroll & Financial Center will continue to use the same requirements as before (see chart below).

Due to the limited time that Google will be supporting the Google Chrome Frame, some IT Support teams are suggesting using Firefox for Workday and Internet Explorer 8 for Payroll and Financial Center.

Please see below for the list of the browsers you may use based on your computer’s operating system:

Payroll & Financial Center (E-1/JD EDWARDS)	
If you have this operating system:	Then you can use this browser:
Windows XP Professional Note: Windows XP Home Edition is not supported.	Internet Explorer 6, Internet Explorer 7, Internet Explorer 8, Firefox 2.0, Firefox 3.0
